---

To all our beloved live in Germany,

Hello!

We know by this point Corona virus is spreading all over the world. In Sri Lanka also the number of Corona patients has risen to 86. The airport has been closed and All the Sri Lanka has lock down by this time. Because the situation in Sri Lanka is likely to get worse in the future. By this point the developed countries cannot control this situation. So, we are also afraid of how to control Sri Lanka. As it is poor country. We are also

searching about Karlsruhe and Germany daily. We are very sad and we are remembering you all every time. You always be carefully. Because this situation is very bad. When you go out of your home, please use face mask and always wash your hand. Please follow the rules of the World Health Organization. Don't go to town every time. Be as careful as possible. May the Triple Gem bless you !!!
