

KSP No. 604 – Dewduni

The last day, I went to the home of a scholarship recipient, about 26km from the Children Center which took around 2 hours.

She is Dewduni, a grade 6 scholarship holder.

I started a friendly conversation with her. She is the youngest child in her family. She has a pleasant looking elder sister. She has done her studies well. But unfortunately, her university studies were interrupted due to financial difficulties. Dewdunee's mother is a housewife. Her father makes reed vatti as a work.

I asked about her hobbies. She told me she loves painting. And also, she told me her favorite subject is science. I visited all the parts of her house. It is uncompleted home with 2 rooms and a kitchen made by clay. I noticed every part of the house was dust free and clean. They have one bed room with one bed. Dewdinee sleep on that bed with her mother and sister.

Bed room

living room

Kitchen

toilet

This little girl desk was also seen to be kept very neat and clean.

In the end, she said that she would study well despite the financial difficulties and told me that she was very happy to come to the center for Saturday classes.
