

## **KSP No.619 – H.A.K.Oshadee**

Last January, during the school holidays I went to the house of another of our student, 619- Oshadee. It took 10-15 minutes to reach her house.

She lives with her mother. Her parents were separated. And also, Oshadee and her mother live in a rented house. Her mother is a housewife. She is a mother who makes great sacrifices for her daughter and is very protective of her daughter. They have a very simple life style.

This year, Oshadee is in grade 7 at the school nearest home. She is going to school by foot. Her mother, who is always helpful with the center's activities, welcomed me into her home with great joy.

I started my conversation while I was visiting every part of their home. Oshadee is very capable for her studies. Mathematics is her most liked subject. And also, she loves to learn German language.

When I was walking here and there in the home, I saw their poverty and the helplessness of the absence of a father in a family. But amazingly they are so used to it that they never mention it. I saw that the same amazing ability and courage were present in Oshadee's mother and in her as well. They thanked specially her god parent, Mr. Samuel and our reverent therapist for selecting her for the programme.

When I asked about her future Oshadee told me, no matter what high-level job I pursue in the future, I want to live as a pious and virtuous person. As a little girl she made me surprised. But I believe her words and surely, she'll do it.
