

A Little About me...

I am Tesheema Chammi. As you know I am the computer operator of the Karlsruhe Children Center.

I was born in 27th December 1991. I did my studies very well. I also passed the Grade 5 scholarship exam. I faced Ordinary Level exam in English medium. For Advanced level exam I choosed biological stream. After the school I obtained ability of accounting by studying AAT course. I can speak and write English very well.

Now, I'm married and I live with my husband and daughter. My husband also works in a private company, Nippon Paint (Sri Lanka) PLC. My daughter is 07 years old and she's studying in Grade 03. I have mother, father and a younger brother. I am the eldest in my family. Now, I live separated from them.

My husband and daughter

In my personal life I have to achieve some goals. The main thing is, I want to support my husband by financial side. And also support to my parents. I feel it is my duty to help him financially because we hope to make some differences in our living conditions.

I love to work in Karlsruhe Children Center with the organization, with the children and with the parents. I think it is my fortune to work with our rev. Thero, who always advise me since my childhood. And also, I respect the temple as a villager and a former student of the Dhamma School as well as a former Dhamma school teacher.
