

## **Beyond the Stage – KSP No. 567 – Nadini**

Recently, I visited the home of Nadini, a bright student in our programme who is currently in Grade 09. Many of You recognize Nadini from her remarkable dance performance at our recent scholarship awarding ceremony.

Living just fifteen minutes away from our center, she continues to pursue dancing as a hobby. Showcasing her talents not only in our programme but also at her school and Dhamma School. Interestingly, while she has a deep passion for the performing arts, she shared that mathematics is her favorite subject. Her creativity also extends to hand crafting, as she proudly showed me several decorative items such as key tags and flower decorations, which she had meticulously created.

Upon my arrival, I was warmly welcomed by her entire family. Her father earns a living through carpentry while her mother is a dedicated full-time house wife. Nadini also has a younger brother who is currently in grade 03. During the visit, I was particularly impressed by the discipline and orderliness reflected in her environment. From her neatly organized study table to the overall cleanliness of her room and home, it is evident that she maintains a systematic and diligent approach to her daily life and studies.

In our conversation, Nadini expressed a strong desire to further develop her dancing skills while remaining focused on her academic goals. Her ultimate aspiration

is to complete her education successfully and emerge as a productive and responsible citizen. It was heartening to observe such a balanced combination of artistic talent, academic interest and personal discipline in this young student.
