

Empowering Digital Futures

The IT Lab Modernization Project

We are incredibly proud to share a major update on the total transformation of our IT Laboratory. Thanks to the generous financial sponsorship from Patenkinder Matara / Karlsruhe (Germany), we have successfully launched a complete modernization process to provide our students with a cutting-edge technological environment.

Key Upgrades & Completed Work:

With the funds received, we have optimized every rupee to ensure maximum utility and quality:

Brand New Hardware: We have purchased 10 High-Performance Desktop PCs to facilitate smoother, hands-on digital learning.

Ergonomic Furniture: Specialized, brand-new computer tables have been acquired to set up a professional and organized lab layout.

Modern Teaching Tools: A new Whiteboard has been installed to assist in theory and interactive explanations.

Upgraded Infrastructure: The entire internal power supply and electrical wiring have been completely re-done from scratch to ensure safety and seamless connectivity.

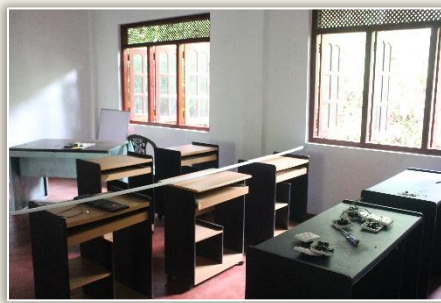

Fresh Ambience: The entire indoor environment has been completely repainted and redesigned to give the children the thrilling feeling of walking into a premium, modern computer laboratory.

A Heartfelt Note of Gratitude

Our dedicated IT Instructor, along with the entire management team, extends their deepest gratitude to our German sponsors. We are incredibly thankful for this financial blessing, which has been utilized to its absolute maximum potential.

By upgrading this facility, you have not just built a computer room—you have opened a digital gateway to the world for our wonderful scholarship children. Thank you for always believing in their potential!
